

Steps for testing a Voice XML application:

1. Go to <https://evolution.voxeo.com/> and click the “Join Today” button to create an account. Wait for a confirmation mail and access your account with the password provided.
2. Under Documentation Tutorials, read through the VoiceXML 2.1 tutorial.
3. Create a VoiceXML file and upload it to your ccs web directory.
4. Back at the Voxeo site, go to the Application Manager.

5. Click on Add Application, choose Voice phone calls, then select Prophecy 8.0 VoiceXML 2.1 from the menu that appears.
6. Type a name for your application, and under “Voice URL:” type the url to your xml file you created and uploaded in step 3.

7. Click on the Contact Methods tab. Unlike shown on the following figure, you will not have a direct local number. Call the PIN access numbers and enter your PIN to listen to your application.

Account > Applications > helloworld

APPLICATION SETTINGS

Successfully created the application!

Application Settings | **Contact Methods**
