

IA Analyst - Information Systems and Assurance II
Hanscom AFB, MA

Description:

Jacobs Technology has an exciting, new opportunity for a junior-level Information Assurance Analyst. This position will support the Air Force's Electronic Systems Center's Weather Systems Branch. This individual will help in performing Certification and Accreditation (C&A) for multiple programs. As programs go through their life cycle, their security posture must be certified with the Air Force through EITDR and the eMASS process. The successful candidate will work with a team to go through the DIACAP process to ensure that systems can be fielded in a timely manner.

Daily tasks will involve tracking the process, creating plans and schedules, data entry with EITDR and eMASS, and coordination with test and accrediting agencies.

This position requires US citizenship and the ability to obtain a Secret clearance.

This position may be assigned to a Jacobs teammate company.

This position may require travel of up to one week per month.

Required Skills:

BS degree and 5 years of experience; MS degree and 4 years of experience; or PhD required.

A Degree in a computer-related or network security field (Computer Science, Information Systems, Information Assurance, etc) is required.

Familiarization with DIACAP, EITDR, eMASS, IA Controls, and DoD certifications and accreditations is desired, but not required.

Having a CISSP or Security+ certification is a plus (you may be required to obtain a minimum of a Security+ within 6 months of your hire date).
