

Professional Services Consultant

Tracking Code

U11-482

Job Description

Combining best-of-breed business process automation and imaging technologies, the Kofax MarkView solution provides seamless integration with the world's leading ERP systems resulting in significant cost reduction, improved efficiency and enhanced visibility for enterprises.

The Consultant will work with clients to solve business problems through the use of our world-class solutions. He or she will be responsible for the successful implementation of these solutions, including the design, configuration and deployment of the Kofax MarkView product suite. This role will quickly provide the opportunity to take overall project responsibility in leading both the client interaction and the system implementation. This role can advance into a Project Manager or Solution Architect position as strong experience is gathered in Kofax technology and processes.

We strongly believe that this technical and functional consulting role is more fulfilling and challenging than traditionally segmented professional services roles, and provides our clients with a more efficient and value added project team. Consultants must have strong intellectual skills, a high level of enthusiasm and be energetic about providing great solutions to world-class customers.

The Consultant will:

- Work with our customers to enhance business processes through the implementation of the Kofax MarkView solutions.

- Perform the full technical configuration and customizations required for the deployment of our solutions.

- Assist or drive other deployment activities such as: requirements gathering, functional design, user acceptance testing, issue resolution, installation and training.

- Collaborate with the Kofax Professional Services team to ensure the successful implementation of the solutions.

- Function as the Kofax subject matter expert when onsite at the customer's location.

- Work closely with the Kofax project manager to keep projects on schedule and within budget.

- Actively participate in the ongoing improvement of the Kofax MarkView product suite and processes.

- Must be able to travel up to 25%.

Required Skills

- Ability to work effectively independently and in a team environment.

- Ability to understand both the functional design and the technical project requirements.

- Strong verbal and written communication skills and ability to facilitate client meetings.

3-tier architecture and software development experience highly desirable.
Working knowledge of Oracle RDBMS architecture, design and tuning.
Solid SQL and/or PL/SQL programming skills.
Working knowledge of UNIX and Windows platforms.

Required Experience

Experience with business enterprise applications such as Oracle E-Business Suite or SAP desirable.

Two to three years of consulting experience or equivalent highly desirable.
BS/BA or equivalent required.

Job Location

Bedford, MA, US.

Position Type

Full-Time/Regular
