Software

Programmer for document management system for the **Perseus Digital Library** (<http://www.perseus.tufts.edu>) 1999–2002. One of the largest, and most popular, humanities digital libraries, Perseus presents sources for language, literature, art, and archaeology for several periods from the ancient Mediterranean through 19th century North America. Users viewing documents receive automatically generated information on morphology, lexicon, translations, technical terms, and named entities, as well as temporal and spatial visualizations.

Programmer for **Perseus: Sources and Studies on Ancient Greece**, 2.0 (Yale U. P., 1996), 3.0 (Yale U. P., 2000).
