Team Assignment 6 - Computer Prototyping

To install and test MBTA quick guide one needs to install some Android tool. We are using MIT App Inventor for creating and deploying Android app. It can use an emulator on a pc from a browser.

1. Install [Android SDK](#).
2. Get the .apk file attached with this pdf.
3. Create an AVD using AVD manager of Android SDK.
4. Go to sdk/platform-tools with the command cd /home/android-sdk/platform-tools
5. List the devices with the command ./adb devices
6. You can install the file with ./adb install mbta.apk
