Improvement and modifications from T6

1. Consistency: Navigation between pages was fixed.
2. Design: Made improvements on the color scheme used, fixed contrast issues.
3. Accessibility: Added a functionality, where there is text to speech conversion in android.
4. Ease of use: Added a feature of automatic location detection, so that there is no need to type in the current location.
5. Configured the data base that the application has to use to synchronize with that of MBTA. This set up is still being configured and not completed.
