Undergraduate Finds Passion in Health Care and Health Technology

Senior Nate Bessa describes himself as "quiet and uninvolved" as a freshman. That quickly changed. The College of Computer and Information Science (CCIS) student has since co-founded a nonprofit to improve healthcare in East Timor and developed health technology applications in Boston.

Consortium Collaborators Use Technology to
Transform Health and Care

Professors Holly Jimison and Misha Pavel came to Northeastern for a specific purpose: to launch the Consortium for Technology for Proactive Care. They're leading an effort to develop technology that supports continuity of care outside a hospital setting and promotes long-term health through behavioral change.
